# KRZYSZTOF KOCOT

Grimsby, United Kingdom | 07737341603 | k.kocot0@gmail.com |
Portfolio, Github, Linkedin

## SKILLS

JavaScript,  HTML, CSS, React, TypeScript, SCSS, Figma.

## ABOUT ME

Over half a year ago I decided to start learning programming. From the very beginning, I focused on learning how to create websites. I designed all my project in Figma and wrote them myself. I am still learning, and I can see the distance ahead, but it doesn't discourage me, it just encourages me to gain more knowledge.

## PROJECTS

**London Site**   Github, Live Server

· Site created with HTML, SCSS and JavaScript devices.

· In this project, I focus on UI / UX.

**Todo App**   Github, Live Server

Site created with React and TailWind.

In this project, I focused on React functionality.

Application for creating and editing tasks.

**Cards**   Github, Live Server

Website created with React, without any kind of design.

In this project, I only focused on the mechanical part of the website.

A simple card game in which two players draw cards. The card with more strength wins the turn, then takes both cards from the table and places them on a separate deck. After all cards have been dealt out, shuffle the winning cards and use them as our deck.
